

SOLUTION OVERVIEW

WanderGuard[®] BLUE Wander Management

Helping caregivers protect residents

WanderGuard[®]
BLUE

Solution Benefits

- **Affordable, next-gen technology.** WanderGuard BLUE uses a new generation of technology, including Bluetooth[®] Low Energy (BLE), to not only deliver a wider range of functionality, but also to reduce the cost of ownership.
- **Easy setup and management.** Setup time is cut in half compared to other solutions. Everything is handled on the WanderGuard BLUE Manager tablet application, which allows a quick upload of the door configuration and users lists to each Door Controller.
- **Secure and reliable operation.** Every user has an individual passcode and/or badge to clear alarms and bypass exits. User lists can be quickly updated with the app and users' information. This highly reliable operation is designed to detect, avoid and overcome interference.
- **Achieve data-driven care.** WanderGuard BLUE offers sophisticated reporting, event management, location information, and audit capabilities to allow end users to benchmark their performance and move towards care programs built on data.

Challenges

Safeguarding senior living residents at risk of wandering. Providing protection while preserving residents' dignity and mobility.

Solution

Protect memory care residents against elopement risk with the most sophisticated—and the simplest—wander management solution. WanderGuard BLUE, a UL 294 certified solution, offers access control and integrates seamlessly with the Arial[®] platform for advanced alerting and reporting. Whether you need to protect one door or an entire campus, it's an affordable and scalable solution that grows with you.

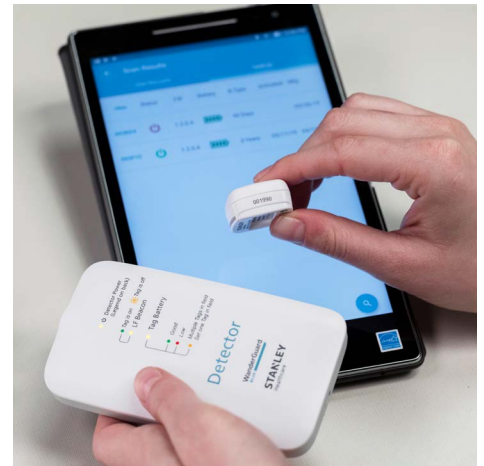

How It Works

WanderGuard BLUE combines small and discreet resident bracelets and door components with streamlined design and simplified management. When a resident with a bracelet approaches a monitored door, the system alerts and the door locks when paired with optional magnetic door locks.

“STANLEY Healthcare’s integrated WanderGuard BLUE and Ariel solution empowers our caregivers with better tools to care for memory care residents. Providing location of residents and geofencing makes this wander protection solution ideal.”
