

SOLUTION OVERVIEW

Arial® Emergency Call & Nurse Call

Empower caregivers, improve workflow and staff productivity, and improve the overall resident experience

Solution Benefits

- **Personal—and accurate—protection.** Whether from the personal pendant or call stations, residents can call for help whenever needed. Room-level alarm reporting and location helps caregivers respond quickly.
- **Information at caregivers' fingertips.** Alerts can be sent directly to caregivers via the Arial Mobile App, IP phones, pagers or other means, with complete information on the resident and their location.
- **Powerful insight.** The Arial Management Dashboard shows performance against key benchmarks, letting you dig into specific events or call histories. Reports can be accessed anywhere, with automated reports on call volumes and response times.
- **Efficient coordination and collaboration.** Empower caregivers to improve efficiency with the Arial Mobile App. Caregivers can see who is responding to an alarm, track interaction time, and document services performed.
- **A single location for integrated systems.** Arial consolidates management and reporting in one location, including EHR systems such as PointClickCare, event and alarm management from motion detectors, smoke detectors, door and window sensors, temperature and humidity monitors and more.

Challenges

Delivering a safe, secure environment for residents is always a top priority. But staffing challenges, occupancy struggles, and the demands of doing more with less (while maintaining quality care and services) continue to plague many senior living communities.

Solution

STANLEY Healthcare offers the widest range of reliable and accurate emergency and nurse call solutions with both wired and wireless options and solutions certified to meet UL 1069 and UL 2560 regulatory requirements. Arial solutions empower caregivers with better visibility to residents' needs through extensive alerting, notification and reporting capabilities. Arial not only provides industry-standard tools to help caregivers respond quickly to calls for help, but also offers advanced capabilities that communities can use to engage and empower caregivers, improve workflow and staff productivity, and improve the overall resident experience.

How It Works

With Arial, communities have information at their fingertips regarding not only response times and the number of alarms, but also who is responding, how much time caregivers spend with a resident, and details about the encounter. The Arial Mobile App empowers caregivers to efficiently respond to resident needs and document encounters and services. Documentation of services provides visibility beyond standard response time and captures the invisible services that improve quality of life. Arial provides a single source for emergency call, UL 1069 nurse call, wander management, facility monitoring, environmental monitoring, fire panel integration, access control and building automation integration and fall management integration.

Arial® with Arial Mobile App:

A powerful solution to ensure resident safety and security

“The Arial mobile app makes it easier for the caregiver to effectively respond to resident calls. We are able to anticipate and meet resident needs while improving resident safety and satisfaction.”

BECKY HJALTALIN, DIRECTOR OF WELLNESS, HUMANGOOD JUDSON PARK
