

SOLUTION OVERVIEW

Arial® Nurse Call

UL 1069- and UL 2560-certified
wired nurse call solution

Solution Benefits

- **Resident safety and security.**
A reliable and accurate nurse call system serves as a lifeline in time of need, providing the resident and family with an increased sense of security.
- **Meet regulatory requirements.**
Arial Nurse Call is a UL 1069- and UL 2560-certified solution that meets all criteria of the standard, ranging from system construction and performance to tests and marking.
- **Maximize caregiver productivity and efficiency.**
The Arial centralized event management, notification and reporting platform provides caregivers with extensive alerting, notification and reporting capabilities, including a comprehensive mobile app and a dashboard that delivers powerful insights into caregiver operations and efficiency through response and service metrics on alarms, resident encounters, and caregiver services.

Challenges

Timely and accurate alarm notifications are just one piece of the care coordination effort skilled nursing facilities face as they struggle to balance operational efficiency and quality clinical outcomes. With razor-thin margins and a constant challenge to hire, engage and retain employees, administrators wage a never-ending battle to improve caregiver workflow and productivity. Staff are often locked to a nursing station to receive alarms with limited ability to communicate with residents regarding the nature of nurse calls. A comprehensive nurse call platform—powered by optional voice communication, mobile staff notifications and advanced reporting—can improve visibility, simplify workflow, and improve the caregiver experience.

Solution

Arial Nurse Call provides skilled nursing facilities with a comprehensive wired nurse call solution that meets all UL 1069 and UL 2560 standard requirements. The system features customizable peripheral devices; sleek, touchscreen master stations; and high-quality voice communication. Arial Nurse Call is part of the Arial centralized event management, notification and reporting platform, enhancing traditional nurse call capabilities with the visibility of Arial dashboards and reports and the flexibility of a comprehensive mobile app.

How It Works

The Arial Nurse Call master station includes a compact LCD touchscreen, as well as an optional audio handset enabling staff to communicate clearly with residents without the interference of background noise. Patient stations, available in single or dual versions, can be simply combined with a speaker to enable voice communication. The optional Arial Management Dashboard and advanced reporting tools provide insights regarding key benchmarks, and the Arial mobile app empowers caregivers with better visibility to residents' needs and faster, more efficient coordination. This platform expands traditional monitoring and event management capabilities with seamless integrations to WanderGuard® BLUE and PointClickCare® to streamline caregiver operations and improve efficiency.
