

SOLUTION OVERVIEW

Accushield® Touchscreen Visitor Management

A strong, secure first impression

Solution Benefits

- **Make an excellent first impression.** The Accushield kiosk is intuitive and visually appealing for visitors. It makes life easier for your reception staff, too. This modern sign-in process improves service to visitors while helping ensure their information is kept secure.
- **Improve safety and security.** Accushield supports detailed background checks of vendors and third-party caregivers, including immunization and criminal records. This makes it easier to keep unqualified individuals out. You can be automatically alerted if anyone on your watch list attempts to sign in.
- **Understand your residents and community.** Web-based analytics and reporting provide insight—including how frequently a resident receives visitors. Take proactive steps to increase the social engagement of residents who are not visited regularly.
- **Improve disaster readiness.** In an emergency, Accushield can quickly show you a list of visitors and residents who are in the community, accessible from a computer, smartphone or tablet.

Challenges

Preventing entry by caregivers without proper credentials, as well as unauthorized visitors or family members. Ensuring appropriate community disaster preparation. Safeguarding every resident's Protected Health Information. Understanding which residents may be vulnerable to isolation and depression due to a lack of visitors.

Solution

The Accushield® Touchscreen Visitor Management Solution replaces traditional, paper-based visitor logs in senior living communities. It's a digital platform for seeing and managing everyone who visits—whether family, vendors or third-party care providers.

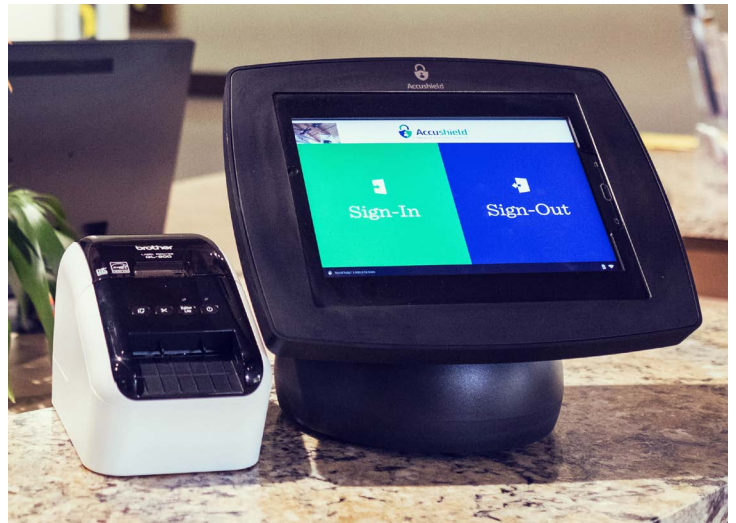

How It Works

The core of the solution is a touchscreen tablet that aggregates real-time visitor information, takes and stores individual photos, and enables visitors, vendors and third-party caregivers to print customized, time-stamped name badges.

“I believe that every third-party healthcare provider that serves a senior resident should meet a standard level of credentialing requirements. Accushield helps us accomplish this goal.”
